

# shoe & leather COLOUR GUIDE

## NOURISHING RENOVATING POLISH

A premium wax based polish that effectively minimises scuff marks and scratches. Buffs to a brilliant shine. Contains natural beeswax and lanolin.

### DIRECTIONS:

Always test in an inconspicuous area before first use. First choose the right shade to match your shoes. Apply sparingly with a soft brush paying attention to the welt and heels of shoes (if polish colour matches heel colour). Polish with a soft cloth to give a long lasting shine.

## COLOUR CHANGE

For recolouring and rejuvenating all smooth leather and most synthetic materials.

### DIRECTIONS:

Always test in an inconspicuous area before first use. Apply colour sparingly with applicator brush provided. Apply a light even coat along the grain of the leather. Allow to dry for at least 30 minutes then

apply second coat. Follow with a third coat if necessary. Leave overnight to dry completely then finish by buffing to a shine.

## ALL LEATHER DYE

A dye for all types of leather. Also suitable for straw and other natural fibres. Not suitable for synthetics or patent leathers.

### DIRECTIONS:

Always test in an inconspicuous area before first use. Shake bottle well. Apply evenly using applicator brush or soft cloth along the grain of the leather. Once dry, finish with a transparent wax polish to seal colour in.

## RAVEN OIL

Waproo's iconic Raven Oil is an oil-based colourant that is recommended for colouring natural rawhide carved leather, cowhide and vegetable tanned leather. Not suitable for synthetics.

### DIRECTIONS:

Always test in an inconspicuous area before first use. Shake bottle prior to use. Apply using brush or soft cloth with even strokes along the grain of the leather.

## SPRAYON COLOUR CHANGE

A professional finish, highly pigmented aerosol colour spray for recolouring leather and most synthetics.

### DIRECTIONS:

Always test in an inconspicuous area before first use. Shake can thoroughly to blend. Spray lightly and evenly from a distance of approximately 30cm to fully coat the surface area. Allow to dry completely before applying a light second coat. Once dry, finish with a transparent wax polish to seal colour in.

The colours on this card are as close as the printing process will allow and are to be used as a guide only to the manufactured WAPROO colour. Always test in an inconspicuous place before first use to ensure product to material compatibility.
